IMPORT THE PACKAGES AND LOAD THE SAVED MODEL

The screenshot shows a Jupyter Notebook titled "model.ipynb" in Visual Studio Code. The notebook is running on a Jupyter Server (Local). The current cell is titled "Test the model" and contains the following code:

```
from keras.models import load_model
import numpy as numpy
import cv2
```

The next cell is titled "Importing packages and loading saved model" and contains the following code:

```
model=load_model('aslpng1.h5')]
```

The notebook interface includes a sidebar with icons for Explorer, Search, Source Control, and Run and Debug. The bottom status bar shows the Jupyter Server (Local) and the current cell is 27 of 28.
