Import ImageDataGenerator Library and Configure it

The screenshot shows the Visual Studio Code interface with a Jupyter Notebook file named 'imgpreprocessing.ipynb'. The code cell contains the following Python code:

```
from keras.preprocessing.image import ImageDataGenerator
train_datagen = ImageDataGenerator(rescale = 1./255, shear_range=0.2, zoom_range=0.2, horizontal_flip=True)
test_datagen = ImageDataGenerator(rescale = 1./255)
```

The interface includes a menu bar (File, Edit, Selection, View, Go, Run, Terminal, Help), a toolbar with icons for file operations, a search bar, and a status bar at the bottom showing the current file path, line/col information, and system status.
